

My Trip to the

Doctor

Rady Children's

I am going to see the speech therapist.

The speech therapist's office is in a big building on the 3<sup>rd</sup> floor.

We can take the elevator to the 3<sup>rd</sup> floor.

We will get off the elevator and go check in.

We will wait in line to check in.

After we check in, I can play in the waiting room.

I need to stay close to my parents and follow directions in the waiting room.

I can sit in a chair and look out the windows in the waiting room.

The speech therapist will call my name when it's my turn to go play.

I will follow directions and walk with the therapist down the hallway.

We will clean our hands and sit down to play.

It's so fun to follow directions and play with the speech therapist!

The therapist might ask me to make funny faces in the mirror.

The therapist might ask to touch my lounge with a soft sponge.

If I follow directions, I will get to play with more toys!

We will talk about pictures while we play.

If I am good listener, I can play iPad games too!

I will wait for my turn and follow directions.

I can have a lot of fun with the speech therapist.

I will follow directions and show them I can use my words.

We might walk to another room to play.

I might visit the group room and sing songs.

If we go to the gym, I will take my shoes off. I can ask for help.

I will wait and follow directions before I play in the gym.

There's a swing in the gym. I will be a good listener in the gym.

There is a tunnel in the gym as well. Tunnels are fun.

I will follow directions in the gym and I will have fun!

When I am done playing in the gym I will put my shoes back on. I can ask for help.

We will walk down a long hallway back to the office.

I can pick a sticker to take home for being such a good listener with my speech therapist

Everyone will be proud of me. It's fun to play with the speech therapist!

It's time to leave. We will say goodbye and leave the speech therapists office.
