

YOU ARE INVITED!

Please help us improve GENDER AFFIRMING CARE

at Rady Children's Hospital in San Diego/University of
California, San Diego

We want patients of all gender identities to get access to gender affirming medical care, feel respected by their medical care providers and to feel comfortable in the environment where they receive care. We are conducting one-on-one interviews with patients to talk about their experiences receiving medical care at Rady Children's Hospital San Diego. We want to hear what you think we can do to make this a more inclusive, safe, and accessible hospital.

You may be approached by your doctor and/or the researcher asking if you would like to participate in an interview. If you are interested, we will give you more information about the interview, which can be done in person or over the phone.

All participants will be given compensation (\$25 gift card) for their time and effort.
