

Getting Started with Glooko

With Your Smartphone or Computer

- 1 Download the free Glooko app on either your smartphone (Android or iOS) or computer (Mac or PC) at join.glooko.com.
- 2 Create an account by entering your name, email, date of birth, country, phone number (optional), and clinic's ProConnect code: _____
- 3 Next, you can create your profile by selecting your type of diabetes, time since diagnosis, and current therapy method(s).
- 4 To connect your diabetes devices, follow the details below on how to connect compatible devices* with your Glooko account.

Scan QR code or visit join.glooko.com to download.

Connecting Your Devices From Your Smartphone

You can set up your glucose meter by going to the **Sync** menu (upper right hand corner from Home Screen) > **New Device** (iOS) or **Add Device** (Android) > Select the appropriate device (Blood Glucose Meters, or Continuous Glucose Monitor, Smart Pens, or Fitness and Health Devices) > Select your meter from the list and tap **Done**.

If your glucose meter is not bluetooth compatible you will need to order a Meter Sync Blue. Order this in the app under **...more** from the bottom Navigation bar. Tap on **Order Sync Hardware** and follow directions.

Without A Smartphone or Computer

- 1 Provide your care team with your full name, date of birth, and email address.
- 2 You will need to accept the email invite from Glooko to connect with your care team.
- 3 Easily upload glucose meter, CGM, insulin pump and smartpen data anytime at the Glooko station in your clinic.
