

# Study for Newborns at Risk for Developing Allergic Disease (ADORED Study)

Principal Investigator: Dr. Stephanie Leonard  
Director, Food Allergy Center at Rady Children's Hospital San Diego

## What

A study to look at whether giving an investigational therapeutic probiotic to infants may help prevent allergic diseases.

## Who

Pregnant women and their healthy infants up to 14 days old may be eligible. One of the baby's biological parents or siblings must have a history of asthma, seasonal allergies, atopic dermatitis (eczema) or food allergy.

## Pay

Compensation up to \$400
