

Oticon Medical is conducting a research survey to learn more about your child's experience with the Ponto Softband Solution.

Softband is a medical device – this means that we, at Oticon Medical, need to gather data and feedback from users about the device. This is to make sure that the softband does what it is intended to do – help people hear! By participating in this research survey, you can help us gather knowledge around the softband solution. This way we make sure that our products keep improving and we can help more people with hearing loss.

Scan the code below to learn more and sign up for the survey.
