

FOR PRIMARY CAREGIVERS of our AERODIGESTIVE patients:

Hi, my name is Soraida Rodriguez, aerodigestive NP at Rady Children's Hospital San Diego. I am cordially inviting to you to join our aerodigestive team and "AERO Connect".

Aero Connect is a new monthly zoom family advisory committee co-run by medical staff and persons who live with and/or care for children with aerodigestive disorders. The aerodigestive team aims to help children breathe and eat better. The mission of this family advisory council is to support those who support us. We are a team! This program focuses on allowing all participants to share their experiences and learn from each other in a safe and confidential environment. Aero connect also aims to bridge the gap between medical care and home care via process improvement. We are excited to offer this service and facilitate and employ principles of support designed to empower your family.

Our first meeting will be on April 10, 2024, from 5-6 pm. At our commencing meeting we will discuss: 1) who we are (what does aerodigestive mean anyway?) 2) who you are (introductions and network) 3) plan for the next meeting (i.e. What would help you? Peer and family support/peer links, staff education/ educations sites, community resources/events?) 4) Get my contact information for your future questions!

Please join your Rady's team, we are happy to "Connect".

For questions or to request invite:
