

The Role of Physical Therapy in Different Settings

Early Intervention Program

(0-3 years)

Goals of Physical Therapy: motor skill development that can include riding a tricycle, jumping, playing at the playground and climbing. Also can include working on developmental milestones.

School-Based Early Intervention Infant Programs

(prior to school age) and

School-Based PT (K-12)

Goals of Physical Therapy: any skill needed for the child to be able to participate in a school-based environment such as jumping, running, riding tricycles, climbing, throwing/catching a ball.

Rady Children's PT Outpatient Services

Goals of Physical Therapy: motor-based functional activities such as sitting, standing, walking, climbing stairs and skills needed to access the community.
